CHAPTER V
CONCLUSION

In this final chapter, the writer will conclude the results of the analysis that the writer has done on the movie. This is titled Jurassic World Dominion using the dialogues spoken by the main characters. Not forgetting that the writer also advises researchers who will examine Conversational Implicature. So that the study conducted by this writer can be a guide for other research.

5.1   Conclusion

Based on the results of the analysis of the movie Jurassic World Dominion this study, the writer found two types of Conversational Implicature and the functions of Implicature which were strengthened by Grice and Searle in Sentf theory. As a result, 363 dialogues spoken by the main characters contained elements of Conversational Implicature. Where there are 199 general Conversational Implicature and 163 particular conversational Implicature in the movie Jurassic World Dominion, so it can be said that general Conversational Implicature are more widely used. This is because the movie uses language or sentences that are known through the context of the sentences or are used by people in general so that anyone who watches the movie Jurassic World Dominion will understand and know the meaning of the storyline through the context of the sentences. Meanwhile, in Implicature particularly Conversational, the audience must be able to understand the specific context of the sentences in the story scenes to understand the plot of the story. However, the two types of

Conversational Implicature complement each other in the movie Jurassic World Dominion which makes people interested in the story in this movie. In this study, the writer only took 10 of each type of Conversational Implicature as evidence explained in the analysis.

Then in this study, the writer discovered the function of Implicature found in the movie Jurassic World Dominion. Where there are 21 Assertife Functions, 28 Directife Functions, 25 Expressife Functions, 3 Commissife Functions, and 14 Declaratife Functions. The writer took 10 Assertife functions, Directife functions, Expressife functions, and 3 Commissife functions, 6 Declaratife functions as evidence written in the analysis of this study. In this case, the Directife function is used more in the film Jurassic World Dominion. This is because in the story there is not only a statement but also a command sentence, request, and advice sentence so that the message contained in the movie can be understood, understood by the audience. Furthermore, the Expressive function is the second most used in the movie, because the movie uses a lot of expressions when the main actor delivers a sentence during a scene so that the audience knows the meaning and purpose of the sentence said by the actor. Then the third highest serial number is the Assertife function, where this function is used in the movie to explain information or events so that the storyline is interesting. Furthermore, there are few functions in the Commissife function, where this function is the main character holding back or taking responsibility for what he says and does, in the storyline or scenes in the movie, this is used less so that the Commissife function is found less.

It can be concluded that through the movie the public can learn about the study of Implicature, especially about the types of Conversational Implicature and the function of Implicature according to the context. So that it can make it easier for people to interpret a language according to the current context or what is happening when the conversation begins.

5.2   Suggestion

Based on the results of the study above, the writer can say that in this study there are still many shortcomings that need to be added. In this study, there is still room for broader and further research so that researchers who will study it have the opportunity to study it. Therefore, the writer provides suggestions for further research, especially for researchers who want to examine the same thing as the writer. So that further research can describe more broadly the study of Conversational Implicature.

Then the suggestions that the writer can give, hopefully, people can learn the language better and correctly so that the delivery can be better. The next suggestion is that people can learn Conversational Implicature studies not only from schools or through teachers but from movies as well. This needs to be done because a movie has a message that is conveyed through the language spoken by the speaker. So that people can know the meaning of language according to the context. The writer also hopes that the study conducted by the writer can provide a reference for further research and many people out there.
